

The Migration Book

Subtitle: Global Immigration

Author: Bilal Ahmed

Copyright: 2021 Copyright, @ Bilal Ahmed

As we explore various states and countries, through our various startup incubator programs, we see money movement and the governments to follow. However, cat teaches the lion everything but climb the tree. We are seeing world domination, in power, Super elite white and yellow, moving up the chart, but they are missing a few key ingredients - The brown and black super sauce. Without that, there is no grounding, no public support. So we see huge ambitions, coming out of the virus, California on fire, huge amount of international rich population moving in San Francisco and San Jose area. But they are missing the family. They are missing support of ambitious people. Right now, anything good to touch, becomes an instant disaster, because everybody is looking at it. Towns and towns are changing. Many deserted towns and industries, Hollywood taken over by Netflix, gambling casinos went under, basketball is infiltrated by venture capitals, people are moving. States like Utah don't accept minorities, hence they will be paying large. California has great acceptance of all people - People don't blame them for their misfortunes. In Utah, blame is on the governor and mayors, for not teaching them entrepreneurship and venture capital. The international people have moved ahead. Nevada does much better because it's kind to people. Anything created by money, eventually fades away. Only real emotions, prayers and wisdom will dictate the future, the spiritual ledger and people will move, where they find love - That is with their family.

Chapter: Venture capital - Entrepreneur DNA - Use Case / Farmer - Base Class Cyber Security Internet Dashboard Deal Flow - #ukraine #farmersmarket #nft #web3 #food #startups #localfood

We have found 'farmer' to be the perfect archetype for entrepreneurship while migration begins. The dress code, English hat, long leather jacket and khaki pants, to show venture association. The hat displays product offering, the jacket, quality.

Chapter: Innovator's Problem: Chinese Gooks, Trolls and Spies - #NFT #WEB3 #metaverse #g20 #cern #mrna

As we continue to work with NFT, metaverse, mMRNA and WEB3, we are seeing lots of cancel culture. The Chinese investors, trying to understand the technology. The Indian entrepreneurs, trying to code, looking for resources to build the technology. American venture capital, with deep roots in Chinese venture capital and Government deals - Now pivoting, putting small money out there, to flush out rest of American entrepreneurship. Meanwhile, there are other groups of American venture capital, watching the show, and seeing how the United States Government will act - Having been baited, by Chinese Scouts and Trolls, the Gooks that think - They own the President of United States. A poor soul country, that innovates - Creates food for the un-innovated, failure in business, life and social appeal.

Chapter: Burn & Earn - Lifestyle choices, work ethic or not - Minimum Wage working or not - College or not - Asking family for #money or not - Clothing choices - English choices - Handling problems - Immigration

We are seeing lots of changes in society due to COVID - Burn and earn is the pattern, how much money you spend every money and how much you earn. If the burn is greater than earn, homeless is the result. Many people, under massive debt, and now perhaps passed away, as consequences of COVID. However, the threat of COVID is not done. Many families, are running down to the ground, and countries like Pakistan, having no future. Afghanistan provides Kush and many other viable products. Many countries like China, interested in the entrepreneurship aspect of it. America is coming back for more Kush. If the earn is not there, most the un-employee able are going to suffer. Immigration could only help if you can work.

Chapter: Mount Shasta Experience / In the News

1. OK, I am talking to a friend, my good luck charm on January 1st. 2. This white trash with a gun, tells my friend, "what are you doing here? Move it" 3. I called him a drunk, my friend called him a red neck. 4. I went to get hot water, he had a camera ready. 5. I unzipped.

Chapter: Migrating from Mount Shasta to Silicon Valley - Yoga Society of San Francisco / Presidents vs 108 Upanishads

I stopped by in Calistoga and Sonoma on the way here – Thinking it's going to be really busy here in San Jose, compared to Mount Shasta. I needed a few days of adjustment period. The energy is very different here, more about startups. I stopped by Yoga Society of San Francisco, only for the president to be really bitchy, because the other president quit – They are missing his energy, then they saw me coming in, while the president was in a board meeting. I parked my car, and went for Indian food. 45 minutes later I come back, I think she was paranoid, "How dare you? Never do it again." I am thinking who gives her the privilege to talk to me like that ... We have an issue, because no yogi, Hindu or Indian, read the 108 Upanishads. She is a Sanskrit teacher, never wrote a book, translates ancient Indian Sanskrit material, guarded by Brahmans. Anyway, AZ called right away. He says, "is everything ok?" I said, I just stopped by Yoga Society of San Francisco. They are dealing with a lot.

Chapter: Venture Capital Migrations - #miami #uk #ukraine #startups #bitcoin #web3 #nft #metaverse

As many startup schools have been investing in London, England with CERN for the past year, migrating among others to Miami, its a great time to move to Europe and make a lot of money.

Chapter: American 2021 - Venture Capital, Entrepreneurship, eGovernance, Cyber Security and Government Tech Monkeys

At Shop Ventures NFT, we recently took our international entrepreneurship program, spread across California. We trained thousands of entrepreneurs, having already trained millions of engineers, through a very successful career in Bay Area, California, where any venture capitalist be a witness. "Do you know or heard of 'the ledger?'" will get you there. We went through Nevada and Utah, searching for entrepreneurs, with founder institute, our mentor program backing at us to Salt Lake City, Utah, with a 30 billion dollar fund. We pitched to very brilliant Brigham Young University, send them to our startup accelerator, only to realize that only 30% of the students in Provo, Utah go to BYU, compared to 90-95% when I was going to the University. The city full of meth addicts in downtown. As soon as that discovery was made, we were intruded by very interesting people at Starbucks, completely out of place. I pitched to them, and they were in 'awww'. Because it's things they don't learn otherwise. It was scary to be on the internet, almost like some Chinese system from the internet was connected to Starbucks. So we came back to California, and we don't have that problem here.

Chapter: How will Silicon Valley, California change after the move to Miami, Florida

Silicon Valley wasn't built by these venture capitalists that are moving from San Francisco to Miami. To rewind the tape, whether pure white from America, who are considered Republicans, or Democrats, who make partnerships outside America, for example, China, Russia, etc. and bring outside money in as immigration. Silicon Valley belongs to everyone. However color is color. No matter how long you live in America, could be thousands of years ago, you are not American. This is what white America makes you feel, to it's own, black, brown and yellow. You will never have the privilege, in their #whitelivesmatter view. Till they see someone like me, brown, over qualified for any engineering job. Other engineers start peeing in their pants, when they see me. I pitch for 3 minutes, other people die in their own miseries. I have interviewed thousands, perhaps reaching a million at this point, or perhaps way more. I can tell these venture capitalists to fuck off, and they are right in my face again, the next day. I feel they need something from me. I am thinking the other way, how to unplug. It's your vibe. It's your experience. It's your characters, that the lowly are always competing. We have all kinds of ways to handle these situations. In this case, the venture capitalists are moving to Miami. They will be missed, however will be available on the internet. Their leave is no risk to California.

Chapter: Leaving California in Search for Next Tech Central, #Utah #Idaho #Texas & Florida due to #fire - No #Insurance Burns from Mount Shasta to Tahoe - Social Disruption between Minimum Wage Workers Terrorizing #Startup #employees & #entrepreneurship

The decision for leaving California hasn't been easy. So many friends and memory, however with current state of fire, and pyro cumulus clouds, hovering over California, it's a disaster for investment. Hence, it's better to move where there are normal people, with regular behavior, rather everyone playing artists - The reality of survival very dim, unless you migrate. The social penalty for living conditions, paying enormous price, including mental health. The fires in California, in the past, world's third largest economy, now the resources are spread out all over the world.

Chapter: Venture Capital Analysis - Difference between Good vs Evil - #web3 #nft #metaverse #immigration #eu #brics #g20

As new settlements move into Europe, tao dragons accompanying them, towards startup schools, creating new business and entrepreneurship.

Chapter: Venture capital marketing: Social media branding - Energy Projection - #startup #cookies, #donuts and #coffee - tier psychology - #ukraine #nft #web3 #metaverse #f35 #lockeedmartin #usds #sdfs

How to keep clean profiles on social media although before, very dark personalities. However overtime, woke through monkey #dna. Need vaccine to handle Ukraine crises with proper vaccine, validated by doctor, without yoga, tao and criminal behavior, makes them unhirable in corporate world.

Chapter: Bitcoin vs NFT: Russia, China and United States - Generation Z

With the latest adoption of NFT - Within a few months, on paper \$2.5 billion market, which we

see as \$4000 trillion is just the beginning of the tip of the iceberg that has already penetrated deep into the social culture and mainstream - Americans are now moving into entrepreneurship as a culture, based on crypto currency culture, behavior and social ethics. The hockey stick effort, which the rest of the world now follows. What came at first as a financial engagement, is now a social direction, for rest of the humanity to follow, coming out of the pandemic. Already, the out of style, cash venture capitals are dissolving, migration to other states, from California, where it all started to places like Texas, where Austin is a major technology hub, and Miami, Florida, where the whole state is re-arranged, thanks to the effort by PayPal Mafia venture capital, and the city of Miami, Mayor and officials. All the way up to the governor, similar to California, where all the economists on top are watching the progress. A proof of concept that has now become a jackpot! A pattern that can be repeated in the construction of other cities and states in America, validated by generation Z, grass roots Americans.

Chapter: Venture Capital Unhealthy - Sexual Harassment / Poor Diet, Fitness and Work Habits resulting in Social awkward misfit - Cancel Culture #ukraine #nft - Retired Actors

We have found that many venture capitals don't actually have a fund.

Chapter: Cash vs Coin

Cash vs Coin Psychology: With the latest breakthroughs in brain interface technologies and mRNA studies. The human connection of the senses, eyes, nose, ears, mouth, heart and brain has changed. With ask for vaccines if the reality, non-pigmented, is hard to handle. There are many ways to cope around that, like traveling to another country, e.g. England or local somewhere in America, e.g. Texas. Stay with the vibe of California, and decentralize locally. The psychology of coin has given us a brand new set of opportunities, that some are fast to grab, the others, slow. Looking at each other for ideas, for their next move. However moving in synergy is better than moving with competition. However, if matched by competition, it gives an advantage to study that tier, and move it to your tier. However, cash is in denial. It's like being on the computer or

not, phone or not, facebook or not, choices. If you are not working with coin, you have to deal with society pressures. Why and why not?

Chapter: Venture capital Psychology - 6 Posts = Explosion Bombs #mrna #nft #web3 #ukraine #metaverse #eu #brexit #childhood #psychology #g20

As we make 6 posts and watch explosions in the trillion dollar crypto market.

Chapter: Pioneering & #Immigration - Working in #America vs #China, #Pakistan, #England, #India, #Russia - Building #NFT #WEB3 #metaverse #mRNA - Venture Capital returns - 10 years

With the latest breakthrough in NFT, WEB3, metaverse and mRNA technologies, the world is changing. Based on competition, the money raised by venture capital, for over 12 years - The Chinese penetration in the American economy, all the way up to IPO. But when the investment model becomes global, i.e. Russian investment in Bitcoin, the world will do anything to protect it's investment. However, when a design façade happens - It changes the core of ALL business models. Imagine going from a black and white television to color TV. We faced the same kind of problems. There are venture capital, betting on technology, and there are other investors, that are attacking entrepreneurs, building the technology, doing all in their power, to break them. But what kind of psychosis does this? Perhaps for the MOST HIGHLY competitive. But you still have to explain to everyone, what you do every day. Besides, trolling and spying on the innovators. But not pay a penny.
