

The Corporate Book

Subtitle: The Work Ethics required to work in a Corporate Office.

Author: Bilal Ahmed

Copyright: 2021 Copyright, @ Bilal Ahmed

As we work across various corporations: Banks, Startups, Defense Contractors, Yoga Schools, Monastery, Tao Centers, Mosques and other places of education, including NBA, where superstars like Lebron James, educate children in communities, or P. Diddy, that educates youth by music, where you can hear Dr Dre notes, very distinct, between east and west coast. So does basketball players style, for example Stephen Curry, where young kids inspired by his work ethic, copy the style and body gestures. In working with startups and corporates, it's not any different. Over time, we build a reputation, if you are the good guys, on virtue, accountability, loyalty, that builds long lasting relationships. If you don't have that, you end up paying for it, for example \$4 billion in a social network.

Chapter: Identifying *bottom* Investors and Recruiters -
#nft #web3 #metaverse - Compared to preferred vendors
#socialmedia

Investors and recruiters have one thing in common - A dime a dozen. However, the deal flow goes through preferred vendor. Its the dealer of choice in long term. The conversion rate is always higher. The difference between A and B players is understood by, "full stack java - please see resume.

Chapter: Diversifying Investments - Earth Burning +28 years - Real estate (fraction of interest) vs Technology cc Ukraine crises - Socioeconomic changes cc #nft #web3 #metaverse

By building relationships and partnerships, in the turnkey society, investments are key - To receive commitment and learning - In turmoil, greatest rewards, like nft.

Chapter: Venture Capital Gains - #ukraine #immigration freedom - #eu #entrepreneurship #investments #g20 #brics opportunity family - new life #startups #nft #web3

As Russian attack continues and migrate to various countries and working towards startup schools, there is lots of money in Europe. With the new freedom, similar to Syria for Ukraine, there are many social services available, upon arrival.

Chapter: Design for UX, UI - WEB3 - Framework for

#NFT, #Metaverse & #Crypto - A Façade with Web, WWW and Web2 Design Palette

As we continue pioneering with design patterns for NFT, metaverse, e.g. SnoopVerse and WEB3 - We are running into a human façade - A psychology of UX/UI, user experience and user interface, with the brightest minds in technology and news, NyTimes for example, with WEB1 design palette and Facebook as WEB2, startups and corporate world. So we are offering a new package: Pay \$2000 for NFT, WEB3, metaverse shop, write a book: \$500 or read a book, \$10. Get in our startup accelerator program! Buy some coins!!

Chapter: Shop Ventures Metaverse - NFT Marketplace / Blockchain \$5000 Coin Pay Now!

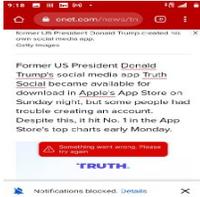

Nft Market place as crowd funding (venture capital) or source (technology) for blockchain. Companies are wrapping their core competency with nft, web3 and metaverse - we can build metaverse from shop - \$5000 coin

Chapter: Owning Vocabulary - The Art of Entrepreneurship - #social #socialmedia #socialnetworks #nft #web3 #metaverse #trumpsocial #snoopverse #revoltsummit #blacklivesmatter #rainbowfamily #dna #mrna upgrade

The art of entrepreneurship - Business. What money can't buy. When you get there. Buy a coin! Write a book. Build a startup. Tao diet. Proper yoga - Endurance. Watching the game - viewing tape is different. Rather why? Just do it, Nike commercial. The world awaits. Anxiety builds. Criminal instincts arise. Its first day of the week, but what about me. Left alone. Need sympathy?

Why the cheapest only provide that. But look at them now. Who are they competing? Or surviving? Or dying.

Chapter: Using Tech To Improve Productivity - By Cody from Techdeck.info

Using Tech To Improve Productivity

Entrepreneurs and small business owners are notoriously tight on time, continually striving to make the most of every minute of every day. While start-ups, in particular, require significant time and attention to get up and running, some strategic planning can help ensure that as a business owner, you still have a healthy work-life balance, and your employees have the flexibility they need as well. Technology can aid in this effort.

[Mytweetmark](http://mytweetmark.com/) has put together the following benefits and tips for using tech to improve productivity.

Project Management Software

Using programs and apps to track projects, especially those that focus on agile development, can be a time and sanity-saving tool. Programs like Workfront, One Note, Slack, and Wrike are platforms that allow multiple people to simultaneously access information, collaborate on projects, and create timelines and task reminders. They also serve as central repositories for storing shared materials, like drafts and timelines, as well as project collateral. In addition, these kinds of programs can help you allocate workloads, create approval processes, and essentially keep everyone in the loop from a project's start through completion. This is an especially good approach for

[remote teams](https://www.talent-quarterly.com/5-myths-about-remote-work-busted/).

Communication Forums

Technology allows us to stay in touch from just about anywhere, at any time. [Video conferencing](https://www.voipreview.org/free-web-conferencing) features and communication platforms like Zoom, Skype, and Microsoft Teams can keep individuals and teams connected, and promote a collaborative work environment. With platforms that can be used across devices, and be integrated with in-person meetings, there's never a reason for anyone to be out of contact or out of touch. This speeds efficiency and frees up time.

Productivity Enhancements

Technology has come a long way in terms of creating ways to help us be more productive. In addition to apps and programs that allow us to work from anywhere, the right

software can help you manage your workers, create invoices on the spot, and stay on top of schedules. This can especially come in handy if you're managing field service technicians, as you need to stay updated on their location, work order status, and type of work order being performed. While tech is sometimes blamed for keeping us overly entrenched in our work, when used wisely, it can be an aid to keep us focused, improve our professional skills, and in essence, teach us how to work smarter, not harder. This leaves time for personal and family involvement, both of which allow us to recharge, refresh, and be more effective professionals.

Financial Management Tools

Many operational systems can be automated or augmented by technology, saving you both time and money. Employing a payroll system can save you headaches and stress, regardless of the size of your staff. The right program can track timesheets and simplify management functions. A system with a mobile app lets you handle these tasks on-the-go, and when paired with software integration and real-time reporting, you can save time while being highly organized. This is especially beneficial come tax time, and you'll be better positioned to track expenditures and stay on budget.

We live in a fast-paced world in which the lines between work and home can often become blurred. For those looking to develop fulfilling long-term careers, Psychology Today says finding a balance is critical, not only to personal health and wellbeing, but for professional creativity and rewarding work. Technology, when used in a smart and thoughtful way, can aid in this effort.

Mytweetmark can be an asset for customer development, agile development, and venture capital funding. Explore the tools that we offer on our website!

Chapter: Career Management - Corporate Title - Cash vs Coin Psychology - Trade allowance at Work -

Understanding Entrepreneurship - Social Projection - Action vs Talking - spouse is watching vs kids - #nft #web3 #metaverse facade

The eternal life, like in the movies: dune, the eternalis and matrix trilogy - Humans are measured on accomplished.

Chapter: Venture Capital Reaction - Economic Recession & #NBA #NFT #dogecoin

At Shop Ventures NFT, watching our work with NASA, super confidential, compared to NFT markets. Before we started the work, we were in NFT, now in NFT2. We were in web3 before - Jack Dorsey, twitter founder already suggested web5 and Marc Andreessen, web4. One venture capital from Silicon Valley, San Francisco and Mountain View area, says, "note: if i haven't responded to your first cold pitch email, and your 2nd and 3rd reminders, then maybe i'm not gonna... so please fucking stop.". In response, the other venture capital, also sort of part of NBA Golden State Warriors ownership, shows picture of, with another venture capital on the airplane. An old CEO, part wanna be venture capital, says, "Shocking. Our country is moving backwards in time at nearly every turn possible." Another VC, tried to explain Roe vs Wade, "i strongly agree with roe v. wade and i don't agree with it being overturned--very sad day but it exposes a flaw in our system both times--the supreme court as unelected lifetime-appointment legislative body (turns out you can even mis-state your views under oath!) is not good".

Chapter: Entrepreneurship Survival - Cost: Traditional Venture Capital - Show the #Money, but not Give - vs

#NFT #WEB3 #metaverse #multiverses #crypto #bitcoin #developers & #investors - Holding Shares & Equity - Money Management / Earn & Burn

Now that we have equal and/or greater number of Black Lives Matter investors, aggregated more than White Collar Venture Capital generated Machine Entrepreneurs, we have to discuss the advantages and disadvantages of this competition in 2022. Holding the money, in between cash and coin. Understanding valuations, and records of investors, if taking money from outside investors. Check their Wikipedia and LinkedIn profiles. We have many scouts and scam artists, funded by traditional venture capital, from Shark Tank, Stanford and SXSW, however to understand that they have already hit their peak, and bringing down anyone, that is above in stature, as a business technique, back to the bosses, that control their companies making it to IPO, public markets. So if your investor has harassment and predator history, chances are slim, they are going to make it through later rounds.

Chapter: Testing Buyer Marketplace: #nft #metaverse #web3 - celebrity products vs services - #leanstartup #customerdevelopment - Long term #software #investment - #startupschool #accelerator - conversion rates - human population #IQ #EQ - why not?

With the launch of our new platform, we have sent hundreds of messages, texts to our social network and found interesting buyer data - This will allow us to further pivot our software - As investor update, we are long vs short sales.

Chapter: Social media and Recruiting - Utilizing platforms build personal brand - A measure of Success vs

not, e.g. Ukraine crises cc #nft #web3 #metaverse

We have seen all kinds of psychosis - In the past year. In all tiers, whether going it or not, including wife and kids - Social anxiety.

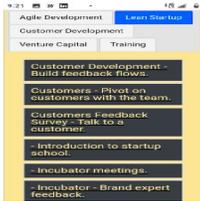

Chapter: Conditions - Startup Journey & Entrepreneur:
#nft #web3 #metaverse #rainbowfamily #blacklivesmatter
- Pressure from society - Sociopathic if not

Fighting conditions to become whole - Working for someone else or some belief being delusion - When put out in the world, of social. Hush, don't say don't tell, a pattern from the past. Let it all out - What is there to hide - Is freedom whether you have or not - But see, if someone else has or not, technology and business, can you let go of your conditioning, and like Michael Jordan, just do it? Its Dre Day today, "motherfuckers".

Chapter: Buy or not? Doing or not? Building it or not?
Coin, Politics, Tyranny, Disease: Business guidelines,
shrinking Psychology with cash to coin - Social
transformation: Virtue signaling #nft #web3 #metaverse -
Buy a Coin!

Show a child a box - They went to draw a line - Above it, fear. Above it - darkness, shady character. Competing when already lost. A fake grin. Now keep walking searching for gold to Infiniti. But when found, what to do with it? So humanity has to catch up - yoga, tao and startups. But if missed the boat, virus is here. So what to do with investment returns? While you miss the play. But maybe that is your game, so far from reality - Difficult to implement. That's why my father is here, 2 of them, for now.

Chapter: Venture Capital Insurance - Predators and Drop Outs of Investments - Free Market cc #sharktank #china #america #NFT #mRNA #WEB3 #metaverse #multiverses #crypto #cryptocurrency #startups #blacklivesmatter #socialmedia #sxsw #Stanford

We have a lot of sympathy for Venture Capitalists and Scouts - Dropouts of #Stanford, #MIT - SXSW. Spying on investors for decades, only to be left in the dark, when China pulls back money, from Soft Bank and Sequoia, many scouts will be working for governments. It will be very essential for these venture capitalists, with predatory history, of harassments, sexual allegations, from shows like Shark Tank. Clean the image for investments, for bigger players, namely Government ETFs, which are long term strategy for United States bonds, and some of it also in stocks. Since we are in a free market, the illegal and criminal activities of venture capitals might continue - Only to get into law trouble for 2022.

Chapter: Shop Ventures NFT - Triple DAO - Decentralized Autonomous Organization - Data Model - for Alpha models and Beta (son) - TAO - Data Access Objects - #nft #web3 #metaverse

At Shop Ventures NFT - Now extending to decentralized autonomous organization - A corporation, DAO, triple tao, data access objects - By privileges, mRNA to work with Tesla energy grids, for future megaverse design, NFT and WEB3.

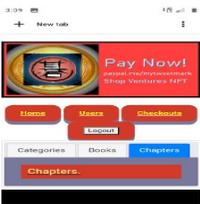

Chapter: NFT Manager - Corporate & Small Business - A new category in #social cc #trumpsocial #snoopverse #nft #web3 #metaverse

We have opened up job openings for NFT manager on various social websites. The job title will help us strategize as we walk through a river of venture capital, "blinded by thy light" with block chain, metaverse, exchanges, build shops and write books.

Chapter: Business Models Measurement - #NFT #WEB3 #metaverse #marketplace - Crowd Sourcing and Funding #startups - Deal Flow - Tiers seed, Series A, B. C and Terms

Working with many venture capital, past virtue signaling only to realize the fake baits of immortality - Everything is measured on merit and not so structured like working a job. People don't allow free thinking in a panicked society - However the competition is large - Investors can't sleep. If you are in technology, best time to build a startup. Work your network to get people and money with crowd sourcing and funding. Get lead angel investors for seed round and pitch for higher rounds. Join our entrepreneur program.

Chapter: Building a Career - Looking for a Job - After the Pandemic - Identifying Education and Location

After coming out of the pandemic, where the birds are flying eagerly over McDonalds, a great place to connect with other hard working people, young, eager to learn, best manners, energetically, physically, mentally and spiritually. The same pattern exists for other locations, Starbucks, Denny's, which allowed free internet access to people, helping them connect with loved ones. Compared to other towns, now deserted, which didn't allow simple benefits, in order to get ahead, now struggling and creating dogmas, for their towns, and discouraging people from taking vaccine, as a death wish. The pattern exists for Democrats and Republicans, nationwide, when you have billionaires that only counted their bitcoin and allowed external countries to buy American venture capitals for free.

Chapter: Business Model - Venture Capital? \$1 Billion Rounds, Buy House, White Collar, Top Down vs #NFT, #WEB2, #metaverse, #crypto, #multiverses #Invest in #Entrepreneurship #Hustle e.g. Food Stall, Grass Roots, Ground Up

As we study the wave of WEB3, NFT, metaverse, crypto and multiverses - We realize that most venture capitalists, that now have all become bloggers, and podcast hosts: Can't afford to invest. The venture capital rounds are too expensive. The chances of making it to top rounds is very slim, to a \$500 Million Mattermark investment, where everyone bought homes. To recent \$4 Billion, Clubhouse investment, where again, everyone bought homes, before any real reaction. To the venture capital game is not on merit. So many entrepreneurs and angel investors, that are currently funneling their time and money up the ladder, have very little chance of making it through. Most entrepreneurs are just burning their own money in traditional venture capital model, getting upset at their bosses, spilling out bean on social media, with negative energy and trying to compete with Black Lives Matter.

Chapter: Startup Ideas: Pixel Project #javascript #web3

#api - #venturecapital #marketplace & #exchange with #startupschool - buy a coin!

The epitome of idea: Coming to all humans based on association - The entrepreneur that is hungry to implement validates the proof of concept - The venture capital decide on the long tail - Because they don't implement lean startup and agile development. So they follow water fall model. However most of the time get stuck, like Mark Zuckerberg because the idea was copied hence never understood social media - Missed the mark for 13 years.

Chapter: Venture Capital Forecast 2022 - #NFT #WEB3 #mRNA #metaverse - #multiverses #Facebook #Microsoft #Nike #SnoopVerse

As we look at the landscape for Venture Capital investments 2021 - We can create a flow chart of investments in 2022. With NFT, WEB3, metaverse on the rise, by Facebook, Microsoft, Nike, Snoop Dogg and many others, many venture capitalists have to gamble for their 10 years return. Notice that many venture capitalists didn't make it to bonds ETF round by United States and Australia governments - Many venture capital funds have to look at bottom deals, building up Fintech companies. However, the competition is hard, and there are bitcoin trillionaires, that now they have to compete with. Lots of startup schools have gone out of business, bringing down internet and venture capital investments. However, the best investor always wins. Good luck with your picks in 2022 and whatever boss you report to, door keepers of the IPO market, perhaps.

Chapter: Psychology of Pitching - Earned Dollar - #nft #web3 #metaverse - Social Hierarchy - Job Fears -

Winners & Losers - Results in Abnormal Behavior - #adhd #fomo #sociopathic #nba #snl #blacklivesmatter #rainbowfamily

In between all the venture capital that can't sleep on Saturday night and "the pipe is getting shorter in 6 months", you can't help but look - See with your own eyes and mind - Validation. Use your own mind to decipher. If you are not technical enough, hiring the right people and partner with the best to make it through the turmoil. But if you are investing in wrong people, you have to turn out of it. It happens in entrepreneurship. But pivot allows you to turn and open new doors.

Chapter: Business Rules - Legal Practices - Management Style - Federal, State and International Laws - Strong and Weak Players #nft #web3 #metaverse

When the daily startup battles at the tip of FCC and SEC.

Chapter: Cameron Tapia - Entrepreneur and Mentor

Cameron Tapia stage name "The Shepard" is the CEO and founder of Ecosoul Records; a forward thinking independent record label that creates music with the intent of inspiring self love, good health, and wealth within our communities. As the Creative Founder and CEO, Cameron upholds the companies vision by creating a culture unlike any other. A man who puts his team on his back, Cameron, has worked extensively to build a guild surrounding conscious values and dedication to the betterment of our communities and planet alike. As a self taught musician and multi-instrumentalist, Cameron, knows what it takes to climb out of the valley and reach the peak of the mountain. His music blends alternative-pop and hip-hop genres to forge an original soundscape that is a breath of fresh air for the industry. After years of diligent study of

the music market, Cameron is ready to make his entry to a larger audience with an VISION so BIG it could save the world! As a humanitarian he intends to inspire hope, unite community, and build value in those who seek positive change and influence in our world.

 Click the link below to stream The Shepard or visit his website for more details and investment opportunities.

 website: https://ecosoulrecords.com/

Chapter: China Funds vs American Venture Capital - Deal Flow and United Kingdom cc #g20 #cern #nft #metaverse #web3 #mRNA

With NFT, WEB3, mRNA and metaverse - Lots of competition in the venture capital industry - Investors getting furious, understanding of the technologies. But this time a rare phenomena is happening - Some technical folks are out of reality. With China pulling back the investment money, bringing it back to the Government - There are many Chinese trolls and spies still left in the Silicon Valley - Bridging the understanding with mainland China, Taiwan and trying to negotiate some common understanding, moving forward, taking advantage of the American privilege. The demoralization with China, with inter-racial marriages, has opened a door for common American to mix the new culture, with ancient Chinese culture, now mixed with Tao and Yoga from India - The understanding being an American is limited. There was a time, a golden era, when the margins for "not understanding" something, was large, in curiosity, but now that the specification of metaverse, WEB3, mrna and NFT is out - All the software venture capitals, that don't have enough technology stack to back their promises are struggling. Partnering with mafia style business, all over the world, to make a margin. Meanwhile, the United States Government is watching very closely.

Chapter: No more Gifts - How to spend \$230 billion of American Taxes - #Florida #Texas #California #Nebraska #Maine #Illinois #Utah #Oregon #Nevada

Back in 2006, developing software for imaging algorithms at hi5, Marc Zuckerberg copied hot or not and added viral formulas, while looking at our imaging algorithms for photo share and albums. Many investors stream holed their investment into one point of greatness. I saw Marc again in 2010 and he was so nervous to take a picture with me - Having worked at Bebo, the building Twitter moved to after seeing Michael Birch exit at \$850 million. Benchmark ventures put \$20 million and got \$160 million in return. Marc was looking at me, later at happy hour, astrally. So the message from the boss is: "no more gifts" having being blasted in the news by Jack Dorsey, x-ceo of Twitter. Meanwhile, space boy and \$230 billion, seems like an obvious choice. Please invest local rather global, e.g. Canada, Sweden, Switzerland, etc.

Chapter: Psychology of #freemium vs Freedom: #business models - #nft #web3 #metaverse

As we continue our customer development, talking to people with experience - Brand, resume or small business, we are getting to know the power of owning your own or strive for one day - However the reality is that you want to look for copy cats in relationship - For example, Dr Dre & Eminem, now super bowl with it's own set of adversaries - Directive behavior that leads to change - Inner across puscifier, tool and a perfect circle.

Chapter: White Paper - Multiverses for Corporates, Media and Startups

There are many metaverses that are being created today. Facebook, Microsoft, Nike, Snoop Dogg, Military, South Korean BBQ and many others, are creating their own version of a metaverse. Facebook is trying to own it, however, we haven't seen much from them recently. Perhaps design their metaverse, however, we have to account for many other verses, for example, spaceX verse, which started the whole NFT, WEB3 and metaverse movement. Recently, Jack Dorsey, CEO of Twitter, with bitcoin, and now WEB3, looking to build, architect and design the next set of metaverses. For this to happen, we have created an Object Model (OO), Object-oriented principles, defining the Verse Object. Like in Bible, Word, or Word Object. With this new set of mRNA API, we are going to get lots of information from the Verse Object.

A few methods on the Verse Object, getName(), gives you the name of the metaverse, for example Facebook. getStatus() is another method, that gives you the current state, for example Facebook would be, "design". getOwner() will get you property rights, of everything you need to know. getSecurity() will get you privileges.

Chapter: Media: Social, Functional, Dysfunctional, Criminal, News, Political, Technical, Business, Spiritual, Music, Video, Photos, Multimedia - #nft #web3 #metaverse

At Shop Ventures - Our experience with leading multimedia teams from software engineering, music, photos and videos + writing the social book for Hillary Clinton, 7 years later, after visiting Brigham Young University and meeting Computer Science and MBA students - By sticking with American education system, being structured - Invited to USDS and SFDS, federal and state digital services, we need to open structured curriculum in university to study these patterns further, especially criminal and news - Social media.

Chapter: Social Networks - Free Service - Database Listing and Connections - Fighting Governments - #nft #web3 #metaverse

With the decline of social networks - Focused back on private labels, to build their own empire rather relying on free services that sell your data for revenue. There was a time when we wanted to be celebrity - Overtime, seeing the affects of social media - By acts, personal life is changed, whether good or bad. Trying to get venture capital off of it - Think Nft, web3 and metaverse has been hard. Especially now brands are in it, music, sports, etc.

Chapter: Crowd Sourcing NFT Business Model - Investment / Angel Investors / Term Sheets / Series A - Deal Flow

Crowd Sourcing - NFT WEB3 Business Model - Launch a shop, sell NFT, aggregate early investors and adopters - Run Customer Development Sprint - Build MVP (minimal viable product) - iterate on feedback - Attract angel investors - Equity - Pitch for Series A - 10 year company road map - Merger and Acquisitions - Umbrella Investment Model to Support any Business Life Style - Longer Bets on Blockchain - Crypto Technology Software - Web3 and Metaverse - Creating new Worlds - Art, Education and Science - Emotional Intelligence - World wide - Teaching - Mentoring - Entrepreneurship - Leverages Relationships - Supporting Families - Love and Peace.

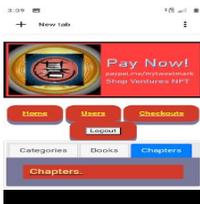

Chapter: Social vs Sociopath - Sociology ADHD FOMO - Brain Testing #mRNA #nft #web3 #metaverse

Lots of recent events - From brain testing by neurolink and mRNA particle being too large and the recent deaths of the retarded monkeys - With meta confusion on metaverse to Peter Thiel kicked out of the board. Last but not least, Jack Dorsey let go from Twitter and recent push from government data, the monkey testing handled by USDA. Are you social or not? If not, is that causing ADHD and FOMO? The venture capital are tossing the word, sociopath. Social is a person - Sociopath - "I'd", a path. That could have criminal penalties. Usually associated with a dollar figure. Gain or loss with social penalties. Especially if sociopathic behavior past social media sites like Wikipedia or LinkedIn and news websites. Allowing sociopaths open business for others and also themselves. Can't find a job, otherwise.

Chapter: Business Models - Crowd Sourcing vs Funding - Water Fall vs Lean Startup and Agile Development - Pivot on Resources - #nft #web3 #metaverse

With traditional business model: In case of Facebook or meta, we are seeing a collapse of resources - Not enough resources to compete with market expectations - A total sellout, loss of \$200 billion - I blame the failure to interview process, not hiring the correct resources - Compared to us. We have established a team of all-star players in our startup school - Crowd Source our NFT WEB3 metaverse marketplace projects, pitch to venture capital for funding. Meanwhile, collecting investments to crowd fund our projects.

Chapter: Global Sales - China and Ali Baba

Recent issue with Jack Ma, Ali Baba and Chinese Government has opened up a huge opportunity for US. Ali Baba is the largest sales, retail store. When you think about Chinese goods, and how they get transferred into worldwide markets, Ali Baba is a major initiative, creating huge presence worldwide. With this disruption, there is a huge opportunity for US startups, to get into the delta of opportunities. Most of this work will be done with partners. We are connected to major Chinese news sources, for example @xhnews on twitter and this shake down, hopefully runs in our favor, because currently we are at a state of sharing global resources. Silicon Valley is known to have connections, between San Francisco, California and Beijing, China. Russia also, invested heavily into news sources, like RT, @rt_com on twitter. This shakedown will be a turn key for global business.

Chapter: With \$230 billion missing - Cash market closed on weekend - bit coin and after trading hours with small investment firms like cashapp and robinhood on #SNL

The venture capital and entrepreneur risk mitigation of investment - Being threatened by society however this is international business. Your 401k and price of food is affected. My father said, weekend is for weak ends. Show us work ethic, "to die for", he says again.

Chapter: China, Sequoia, Soft Bank, Jack Ma, Xi and Space Station: mRNA Testing with California Venture Capitals - Future Investments

As the Space race intensifies, the amount of money poured into Silicon Valley, California and the results - In connection with China's interests and future space investments, in relation with Chinese International Space Station, where all other projects are PoC - Proof of Concepts, till they get merged into A Government. For that, proper procedures need to be met - In relations with Space Force - Future interests integration, including Bitcoin. Please submit a government proposal to proper government agencies. Apply for grants, where required.

Chapter: Venture capital Deadlock 2022 - Two sides of equal measure - Locked on Resources - #ukraine #nft #web3 #crypto

In a microcasm, the venture capital model representing the whole, there is a deadlock on resources; Media wars are the result. Till media is captured, resources are going to shuffle. They are going to continue to churn, till the deadlock is removed. Example is a jam packed set of venture capital, hungrily waiting on social media, deadlocked on news and resources in 2022.
