Chapter: Benchmark Timestamp Venture Capital Performance Review 2022 / Strategies 2023 - #NASA #ITAR #NASAWEBB #WEB3 #Startups #BlackLivesMatter #socialmedia #technology #business #sxsw #sfnt #revoltsummit #leanstartup (Competition includes Domestic Violence, #Lean & #Agile vs Water Fall Models) vs #Space #photos #videos #analytics

As we count down to 2022, we have to look back at accomplishments made this year. Especially, NASA & NASAWEBB, with WEB3. Compared to other venture capital, startup schools, with water fall models, takes too long to build a startup, something to show on social media, with proper technology & business. An exit happens, but the market too short, for a company. Bigger companies, like Facebook, ended up, getting Twitter in law suits with Elon Musk, Tesla & SpaceX. However, with our latest pitch to $200 billion lean canvas startup fund, our valuation is higher than their imagination. Now we can compete with half a trillion dollar fund, and laugh. So when you pick winners for 2023, make sure to look at Domestic Violence History, of some of the venture capital, startup schools, founders & presidents. Stuck in their own group of dead fish, that most of the time spent is on social media, trying to harass the entrepreneurs, building better value properties, vs them, these venture capital, entrepreneurs, leaving their software, dead in the water. Please look at AOL life cycle, before determining valuations.

Chapter: Assuming Leadership Position - American Technology - Brain Interface - mRNA DNA NASA WEB3 Cryptocurrency - 100 years of US Bonds & Stocks - Building vs Buying, i.e. China India England e.g. Writing Software vs Using Phone, Computer, Social Media

At Shop Ventures NFT, working with leech venture capital for over a decade from India & England, so pathetic, that nobody with a sane mind, would ever want to work with them. Not to mention, meet them, who knows where they are at. They are up at English time every morning, disrupting own family and children for their psychosis, because living in the inferiority complex - Never build anything, although pretending to be learning & teaching startups & social media. However, if you look at their background, burnt out depression. When the whole world is screaming for them to stop. They claim, "you don't know what emotional triggers are", in a way to disrupt entrepreneur & startups from things that matter, both technically and socially. However, by communicating with their national news, it's a way for their own country to fix them. Because everything in America is transient, for them. However, for others, they are permanent, legally. So they see us working with American politicians, having no respect. "Hey man", in a poor English, one Hindu says, pathetic, AICD, American Indian Confused Desi.
Chapter: American Leadership: Turmoil in the Venture Capital Industry - Electric Cars, Space, NASA, ITAR,

DoD, WEB3, Government: Troubles Ahead for Investors, ETF, Crypto Currency - Money Models / Business / Culture G20 - International Revenue & Resources

We are seeing the greatest innovation of all times - Many venture capital can't sleep, fighting over returns and ownership. However, with government technology, ITAR and DoD engagements, their investors are risking prison & jail time. Now, with elections 2024, we have to consider, local vs international play. With the casino money at hand, destiny for crypto machines in Nevada and all other gambling states, it's just a matter of time, when the power players come back to their natural sport. Giving away opportunity for future presidents and their children.
Chapter: Mainframe #dollar - #java micro services architecture #web3 vs 50 years old technology hacking #IBM

As with the recent event - Working out of turn, i.e. already having your turn as President, employee, etc. however jumping tiers, expertise, finally stealing hundreds of dollars, from people's account, and sending intelligence after the sufferers. Meanwhile, World Bank getting ALL reports of transactions, which initially thought, was a consumer and local, American Bank problem. Aggregating hundreds to billions of Americans, with money stolen, recently.
Chapter: The Matrix - HISTORY: Zero Point Energy - #DNA #mRNA 16 years of United States President - Access to Computer Systems - Oldest Architecture on PowerBuilder Applications & Stored Procedures - Customer Service #Nevada - Hostage Situation -

#Americans / #Militia #Militants #Hacking #Bank #Accounts - Fake #DriversLicense #Passport #Money

We are trying to determine, the line, where is the LAW? G20, UN, World Bank, etc. Given, no one is fighting. How many employees, to manage how much population? What is the education level required, to engage with other human beings? Every morning, same problem, for the people, fully woke and hacked. Living in a nightmare, "totally", says one Hotel employee. Selling 7 years old white daughter, to 70 years old black man, from Nevada, also on the call center, for stolen money, Customer Service, also the contractor, fixing your road, from Nevada, however the 7 years old white girl, from Redding, California.

Chapter: Sugar Wrapper Intellectual Property Inflation - Top Secret Clearance / Sharing / 1000x for Sugar - America vs Pakistan, Sugar Cane, Farmers, Agriculture, Food Prices / Inflation vs $5 / box, vs 5 rupees.

Millions of people, in public places, start making VERY loud sound with sugar wrappers, made in Australia, for branding, clean, vs raw, open, prices change, through China and Mexico, $5 / sugar box, vs 5 rupees in Pakistan, agriculture country, fires burned America, importing food from Mexico, trucks stuck on the border, inflation continue, prices go up, food stamps taken away March, 2023, cocaine networks hacked, money disappeared from bank account, fake employment history, background check information, planting false evidence, with correct witnesses, thousands of them in Mount Shasta, watching the dark army. Concentration camps required, next, history, repeats, patterns.
Chapter: Owning your own Server - Rather using third-party software for your Brand awareness - #NFT #blacklivesmatter #rainbowfamily #web3 #crypto #hodl

#sexy #palmtrees

Owning your own server. With the NFT and black lives matter investments, richer than average white collar worker, where the brand values are changing. If you own your own server, there is a feeling. You wouldn't understand bands like Jane's Addiction. To get into the media, have your own server and steal, their brand value, by making your brand better.

Chapter: Crypto Psychosis - Anxiety & Depression - Venture Capital Trading Cryptocurrency - Expectations on Opponents, Competition in Human Capitalism - 24/7 Slavery by Energy Projection - Old Fashioned Management - Pre Technology, Business & Social Media - Fight by Power, Thoughts on Social Platforms, however home is Domestic Violence - #startups #socialmedia #nft #web3 #blacklivesmatter #whitelivesmatter #sxsw #revoltsummit #sfnt

At Shop Ventures, as we continue to dissect, the current venture capital models, it turns out CRYPTO PSYCHOSIS, has taken over. This happened by trading crypto currencies earlier, and remove the hockey stick, in order to control money, keeping poor people poorer, however with Black Lives Matter, in the metaverse, NFT & WEB3, the game changing is human capitalism, 24/7 energy projection, old fashioned way, no technology, business or social media, just competition.

Chapter: Bet on Opposite Team (opponents)

For example you like Golden State Warriors to win, bet on Sacramento Kings.

Chapter: The Byte Dog Boat Pattern of Growth Hacking - #BDBP #IPLP Version 2 of "I want what's yours vs take some, give some back of my byte, then the dog turns it into a boat" #ETF #NFT #WEB3 #bit vs #byte - #bitcoin vs #byteCoin (Large Bit according to the gentleman at the Cafe)

In Computer Science, a bit is either 0-1. A byte stores 256. It's an address, similar to the boat pattern of bitcoin, where big players put in lots of money, currently large sum of money from cash, utilizing all the digital assets, by passing lots of fees, paid in cash business. However, the dog in the pattern, is the action trigger, a moving formula, with intellectual property laws, and LP, limited partner, so the IPLP, is the acronym for byte dog boat pattern, BDBP.
Chapter: Human Capitalism: Venture Capital Divisions Methodology - Questions Answers NEW Business Partners - Agenda & Motivation #startups #socialmedia #nft #web3 #psychology #tone #language #pitch #reversePitch #NASA #ITAR 1 Minute Pitch - Startup Schools #leanstartup #agiledevelopment

At Shop Ventures NFT, given that most venture capital can't sleep because of crypto, pressure build up for success, however, used to failures, not knowing how to capitalize the market, with

innovation, so everyday, 24/7 old fashioned projection, with homes full of nuts, sitting alone, if single, and domestic violence, in married cases, putting their whole families failures out in the open, like it's the society's responsibility to fix it, is called human capitalism.
