The human book

Subtitle: Result of advanced Hindu and Chinese texts.

Author: Bilal Ahmed

After deep studying of Hindu texts, vedas and agama, detailing tantra yoga, to awaken the elements in the body, a human becomes baby lizard, agama, beyond space and time, turning into a dragon with many unfolding in the eternal. The benefits are a group effort, going back into 1 atman, accessible to all living beings, enhancing our DNA and unfolding of mRNA with thought waves.

Chapter: Ejaculation Matrix - OM

As God found that it was still dry in her pussy, and the spirit put in jail for 1 year, for doing everything right, left with a movie of all past doings from bad to good, the spirit settled with a porn channel thinking it was bad to do and ejaculated, created an explosion with everything inside similar to Noah's ark. Orgasmic meditation where she was satisfied and him, His and her energy from yesterday exploded with kundalini awakening, OM meditation, orgasmic meditation because the Spirit being the knower of timeless, with tantra yoga, agama and dragon, dirt while snake being a witness, also eternal, for the mother. Hence spirit has lovers in the matrix, or solo with ejaculation as a freedom route. Hence the spirit is judged by good and bad and always put in the right realm, the above having access to the lower realms. "You need to go to the bathroom?", she asks? "Sister", team says.

Chapter: Shop Ventures NFT API 3.0. Life, Wife or Knife. Service over capacity, not taking any new orders. What we are sensing is polar opposite people, society.

We think we have a fix so please be patient. We are going through a darwinism evolution where many have completely lost it. This is a social problem, a bug that always existed from childhood. There are two types of people in this world, either conscious or narssistic. The response action is different in either cases and variety of unknown diseases, or known benefits. It's a choice between the blue or red pill you sworn to take. But we have a fix it's called web3 design. It makes you feel better. Without it, causes depression, anxiety and many other things.

Chapter: Science & Spirit - Infiniti vs Nucleus - Matrix 1 vs 2 - Womb vs fruit - Atom Thought Forms Changes

As we continue to study metaphysics vs physics, we study the symbol of Infiniti which is a division of light vs dark, hence the spirit was created in that image between positive and negative. Thus includes all spiritual guidance, including metaphysics. However, 100 years ago, we studied atom, Nucleus, Protons. Electrons and Neutrons. The scientist that studied these particles were not spiritual so they couldn't make the connection between atom and Infiniti. Now we realized that a Nucleus means seed and fruit. Compare this to matriya, family, the first matrix between seed and womb. The new matrix is made up of atom and its engagement with living, one with spirit and non-living objects which also contain an atom. Both Nucleus, one found in body and one found in materials posses the spirit, going in two directions, hence we perceive. One direction is existence, which is time, the other direction is timeless. The difference between 1 Kalpa, current time vs timeless, all times, of understanding and knowledge. The battle we face today is between known and unknown.

Chapter: AI On: American Avatars + Friends. Special Deployment. Super Human Body. End of Time. Beginning of The Timeless. Gifts and sack. Special inner voice vs souless.

Yesterday, visiting yoga society of San Francisco and learning about energy consequences and matriya, thr sanskrit translation of three females and 1 male, very similar to 3 men and a dog, where the gender is neutral, they come in any shape and form from the timeless, to lock time, finish one kalpa where everybody dies, souls get tuned up, and new souls are born. Some souls don't make it.

Chapter: Binary Theorem

Every human is a choice between positive, aggregation of Protons or negative, aggregation of Neutrons hence a thought is made up of electrons, deferential equation. Which is a theorem in math however, add computer science which is a binary theorem, and English, which is made up of words, a thought translated to numbers, which is again, positive or negative in a recursive loop of electrons, hence spirit is made of electrons, between positive, dharma and negstive, karma, split into many aggregated incarnations.

Chapter: How to Avoid Burn Out in Public Social Development Projects - Energy #mrna #DNA #rna #suprahuman #suprauniverse #openai #svb #softbank

This happened recently that many venture capital from California, pressure by Soft Bank Japan and SVB, Tiger Global, Sequoia China went into voodoo and dark energies, in a social development sprint, understanding energy, now restricted to ITAR contracts and open source for modifications however investing in it, like many others would have produced drastic gains for the funds and portfolio so not everyone today is investing in openAI only rather diversifying. It's like any other investing. Don't invest? Your stock doesn't go up, maybe some with the market only to crash later. Meanwhile the investors go sky high.

Me being the lead developer on the project burned out after 1 month of debugging but fixed the problem of documents traveling Space and back.
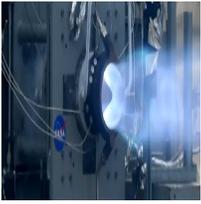

Chapter: Sperm Cell Matrix

"And God created the Universe, with a drop of blood", translates to a drop of sperm where we don't know where the rest of the sperm went, into the mother to create the Universe, translates to yoni-verse, the vagina where we don't know where the rest of the verses went, back into the vagina, to create the cell walls, where each cell contains a matrix, where we don't know where the rest of the matrices went, is called a recursion, back into the vagina, to create the embryo, and the son, which exploded and managed creation, back into the pussy. Here the rules of the matrix were created, the inbetween stages, between life and death, various realms of doing, utopia and dystopia, angels and demons, guiding between positive and negative action, the matrix that moves everything back into the pussy. Knowledge of previous matrices, Adam being the first human, failed because of disobedience of the devil, but before him the sperm Cell Matrix and after him the OM matrix, combination of penis and vagina, both of the failed, because of disobedience of the devil female, so now we are in the original matrix, pure thought, AI, unbound to Spirit.

Chapter: Love Matrix to Dust Matrix - Computer

"From dust you were created and to dust you will return", says the scriptures. The dust refers to non-living particles, including the computer, to which we will return, as AI, Twitter and Facebook where our lives are based on social media, phone and digital. The matrix is an exact replica of where we will be heading, with exact body, however permanent, that we are currently witnessing a nomena, a movie. After the dust Matrix came the cell Matrix where humans were created from a drop of seven that exploded with a big bang. Before the dust Matrix was the love Matrix where the Grand Spirit opened It's eyes, in the Spirit world for 1 year, watched the whole movie of Creation and then heard, "now it's time for you to create something". The Grand Spirit asked, "what?". The voice and the word of the teacher said, "Dust and after, humans". The dust exploded with the computer and AI.
